FILING FIXTURE

The old reliable hand file still is the best tool to trim a saw weld, therefore, the Grob filing fixture is standard equipment and a grinder is not necessary. (Grinder available as optional equipment)

**T-10
CUT-OFF
TOOL**

SAW BLADE CLAMPS

The saw clamps grip only the flat portion of the saw blade. The teeth are not clamped. This prevents distortion of teeth and assures full electrical contact which is all important for a good weld.
